LinkedIn: Touaibi Ahmed

SUMMARY

Full-Stack Developer and Data Science student currently pursuing a career path toward AI Engineering. Experienced in building scalable web applications and working with databases, with growing expertise in Machine Learning, Data Analysis, and Generative AI. Passionate about developing intelligent systems and applying AI technologies to solve real-world problems.

WORK EXPERIENCE

Web Developer — **AQWA STUDIES - Feb 2025 - Apr 2026**

Developed and deployed multiple company websites. Built a TypeScript headless CMS for blog management. Contributed to Django/PostgreSQL backend for an ERP system, using Docker for DevOps and deployment.

INTERNSHIPS

AI Skincare Assistant — **RenYou - July 2026 - Aug 2026**

Developed a personalized skincare chatbot providing tailored routines and product recommendations based on user profiles, allergies, and treatments. Built the backend with FastAPI, SQLAlchemy, and Pydantic, with a BeautifulSoup4 data scraping pipeline. Integrated a local LLaMA 3.1 model via Ollama using Prompt Engineering and RAG for accurate, privacy-focused responses.

PERSONAL PROJECTS

AIOps Platform for Intelligent Infrastructure Monitoring

Developed an end-to-end AIOps platform for automated monitoring and incident detection using Machine Learning. Built a Dockerized environment with Prometheus, cAdvisor, and Node Exporter for real-time telemetry. Applied Isolation Forest, Random Forest, and XGBoost for anomaly detection and incident classification, with FastAPI and Grafana for predictions and visualization.

Data-Storytelling-AI

Full-stack platform that transforms uploaded datasets into AI-generated reports, charts, and business recommendations. React/Vite frontend with FastAPI backend, Pandas data pipeline, and a LangChain + Groq (Llama 3.3) multi-agent system for storytelling, visualization, and conversational data analysis.

EDUCATION

TEK-UP University, Ariana — **2024-2027**
National Engineering Diploma in Data Science

Higher Institute of Technologies, Mahdia — **2021-2024**
License Degree in Computer Technologies

ADDITIONAL INFORMATION

- **Technical Skills:**
- AI&ML: LangChain, Prompt Engineering, Large Language Models (LLMs), NLP, Generative AI
- Data Science & Analytics: Data Visualization, Data Preprocessing, Feature Engineering
- Development: Django, NodeJS, Springboot, ReactJS, PostgresSQL, MongoDB
- **Languages:**Arabic, English, Frensh.
  Certifications: Nvidia Getting Started With Deep Learning
  Nvidia Building LLM Applications With Prompt Engineering
  Oracle Cloud Infrastructure AI Foundations Associate
  Oracle Cloud Infrastructure Generative AI Professional
  SCRUM FUNDAMENTALS CERTIFICATION
